## **Aquahub casual price rise FAQs**

### **Why are the prices rising?**

The casual price rise incorporates CPI and other factors to ensure we can continue to offer high quality programs and services. It will also allow for our members to continue to enjoy a well maintained facility and ongoing capital improvements.

### **What is the casual swim increase?**

The casual swim now includes access to the WWP (subject to entry guidelines). For casual swimmers who swim more than twice a week, the swim lifestyle membership is a great option at \$29.95 per fortnight (this will also allow access to CMP and Aquanation).

### **When was the last price rise?**

The previous price rise was July 1<sup>st</sup> 2014.

### **Why are there changes to the Warm Water Pool (WWP) and what are they?**

The change to access parameters for the WWP has been considered for many years. This has been decided due to extensive market research with what other similar facilities offer. The WWP is designed for rehabilitation and gentle exercise. Children are encouraged to utilise the toddlers, leisure and 25m pools for general play and swimming.

Changes are below:

Guests must be 16 years or older to access the Warm Water Pool, with the exception of those part of scheduled aquatic education classes, or when a letter from a medical practitioner is provided.

### **Why is the gym entry cost no longer the same price as group fitness?**

This decision was decided to encourage more participation in the group fitness programs. We want to encourage patrons wanting to utilise the gym to sign up on a membership to ensure they can be inducted, educated and given a training program.
